Brojen Gurung

Full Stack Developer · **AI/ML Engineer** · Final Year B.Tech IT

Gangtok, Sikkim · +91 8509180657 · brojengurung3@gmail.com · GitHub · Portfolio

SUMMARY

Final-year B.Tech IT undergraduate with hands-on experience in Generative AI, LoRA fine-tuning, RAG pipelines, and Full-Stack development. Built and shipped production-ready applications — from a live client website to a scalable B2B AI system achieving **100% domain classification accuracy** and a university portal serving **324 faculty profiles across 48 departments**. Certified in MCP, Subagents, and Vertex AI with a strong focus on agentic AI systems.

TECHNICAL SKILLS

Languages	Python · TypeScript · JavaScript · SQL · C++ · Java · C (academic)
Frontend	React · Next.js · Tailwind CSS · shadcn/ui · Vite
Backend	Node.js · Express.js · Flask · REST APIs · JWT/OAuth
AI & ML	LangChain · RAG · LoRA Fine-tuning · HuggingFace · MCP · Subagents · MLOps · Vertex AI
Databases	PostgreSQL · MongoDB · MySQL · Firebase · FAISS · ChromaDB
Tools	Git/GitHub · Vercel · Linux · Streamlit

PROFESSIONAL EXPERIENCE

Full-Stack Engineering Intern

Aug 2025 – Present

RWorld Computer Solutions · Guwahati, Assam

- **Migrating** a legacy university portal to a modern Next.js/Node.js/PostgreSQL architecture, serving 12 schools, 48 departments, and 324 faculty profiles
- **Built** Python web-scraping pipelines to extract, clean, and normalize faculty data from 50+ university pages — reducing manual entry errors by 40%
- **Architecting** high-concurrency RESTful APIs with dynamic filtering for departments, schools, and designations, consumed by a Next.js frontend with real-time database sync
- **Engineering** a scalable B2B customer support chatbot with NLP-based domain classification, integrating intent routing into a production Node.js backend

IT Intern

Jun 2024 – Jul 2024

Department of IT, Govt. of Sikkim · Remote

- **Developed** a Python-based virtual assistant prototype for internal query handling as part of the state's digital transformation initiative

PROJECTS

NexusAI — Scalable B2B AI Customer Support *Python · Phi-2 · LoRA · LangChain · FAISS*

- **Designed** full system architecture with LoRA domain adapters on frozen Phi-2, achieving 100% classifier accuracy across E-commerce, Education, and Telecom domains
- **Built** RAG pipeline with FAISS vector stores for company policy retrieval, delivering 257% quality improvement over base Phi-2 responses

Academic Portal System — RWorld Computer Solutions *Next.js · Node.js · MySQL · Python · Tailwind CSS*

- **Architected** a full-stack university portal with admin dashboard managing 12 schools, 48 departments, 156 notices, and 324 employee profiles
- **Wrote** automated Python scraping and data-cleaning scripts to migrate and normalize faculty data across 50+ web pages into a relational MySQL database

Sikkim Tourism AI Chatbot *Python · LangChain · IBM WatsonX · Streamlit · FAISS*

- **Engineered** a RAG chatbot trained on official Sikkim government PDFs with auto-updating vector store via file hash detection
- **Built** Streamlit UI enabling real-time tourist assistance on Sikkim history and transport fares

Gurumurti Decorators — Client Website *React · TypeScript · Tailwind · Cloudinary · Vercel*

- **Deployed** a live production business website with Cloudinary-powered admin gallery panel —
- **Implemented** SEO best practices and fully responsive UI, significantly enhancing client online reach gurumurtidecorators.com

Trading Seeko — Crypto Paper Trading App *Next.js · TypeScript · In Development*

- **Building** a crypto paper trading simulator with integrated beginner lessons — core trading engine complete, targeting Q2 2026 launch

AI Wallpaper Generator *Python · Stable Diffusion · CUDA*

- **Built** a local image generation pipeline using Stable Diffusion with CUDA acceleration optimized for 4GB VRAM, enabling fast offline high-quality image generation
